KEYSTONE MT5 — Setup (Step 1: read only)

Build MT5 BUILD 2026-10-24a • for MetaTrader 5 (IC Markets) on Windows

What this version does

Shows your account (balance, equity, open P/L, margin), the Market Watch prices and every open ticket and pending order, live, in the Keystone window. It contains **no trading code**: it cannot open, change or close anything. Safe on your real account.

1 The two files

- `KeystoneBridge.mq5` — the small bridge for MetaTrader 5
- `KeystoneMT5.exe` — the Keystone app

Save both, for example on the Desktop.

2 Put the bridge into MT5

- MT5 → **File** → **Open Data Folder** → open `MQL5` → `Experts`.
- Copy `KeystoneBridge.mq5` into that `Experts` folder.
- In MT5 open the **Navigator** (Ctrl+N) → right-click **Expert Advisors** → **Refresh**.

3 Compile it once

- Double-click **KeystoneBridge** in the Navigator → MetaEditor opens.
- Press **F7** (Compile). The bottom must say **0 errors**. If not, send a screenshot.

4 Allow the local link

- MT5 → **Tools** → **Options** → **Expert Advisors**.
- Tick **Allow WebRequest for listed URL** and add `127.0.0.1` → OK.
- Make sure the **Algo Trading** button in the MT5 toolbar is ON (green).

The link stays inside your PC; nothing goes to the internet.

5 Start the app

- Double-click `KeystoneMT5.exe`.
- First time only: if Windows asks for the **.NET 8 Desktop Runtime**, click Yes (free, from Microsoft), install it, then open the app again.
- If Windows SmartScreen says "Windows protected your PC": click **More info** → **Run anyway** (the app is new and not signed yet).
- The app opens on ⚙ **SETUP**: "waiting for the KeystoneBridge EA".

6 Start the bridge

- Drag **KeystoneBridge** from the Navigator onto any ONE chart (e.g. XAUUSD) → OK.
- The chart's top-left says **Keystone: connected to the app**.
- The app turns green (● LIVE • REAL) and opens 💼 **POSITIONS**.

7 Check

- Header: account number, REAL, HEDGING, 1:500, balance, equity, open P/L, margin level, the equity bar.
- 💼 POSITIONS: your tickets per symbol (lots bought / sold, net, P/L) and the pending orders.
- 👁 MARKET: every Market Watch symbol with bid / ask and spread.
- Send a screenshot — then the next step (the chart) follows.

If something is not right

- Chart says *"add 127.0.0.1 …"* → step 4 is missing.
- Chart says *"waiting for the Keystone app"* → the app is not open (step 5).
- App says *"port 47123 is busy"* → Keystone MT5 is already open; close the second window.
- App red *"MT5 DISCONNECTED"* → MT5 was closed or the EA removed from the chart; put it back (step 6).
